

Basic Massage

Assessment Task

You will massage a class-mate in the student massage clinic. The class-mate which you are to work with and the timeslot in which you are to perform the massage will be determined at random by the course coordinator.

Non-attendance will lead to a not competent grade for this module.

You will be assessed against the items on the Basic Massage assessment schedule. It is strongly recommended that you regularly practice for this assessment by massaging a classmate, and asking them to grade you using this assessment schedule.

Completion of this assessment indicates competence in the safe practice of relaxation massage, and must precede any work in the student clinic with members of the public.
